*Vecoplan to present shredders for recycling at RWM in Birmingham:*

## **Powerful solutions for a growing market**

**At RWM (13-14 September) in Birmingham, England, Vecoplan will provide information on its shredding, storage and conveying solutions that can be used to process different materials into high-quality output. The powerful VIZ 1700 will be on display. Users of this machine enjoy a high level of availability, low operating costs and maximum throughput. Vecoplan's Recycling/Waste division is experiencing a growing UK market.**

RWM, the Recycling and Waste Management Exhibition, attracts manufacturers who present their products, services and solutions, as well as governmental and private companies from the waste recycling sector. In Hall 18, Stand R-N130, Vecoplan will be showing its VIZ 1700 L5 shredder and other products on its 54-square-metre island booth.

This extremely energy-efficient shredder offers users a great deal of flexibility since it's capable of shredding an extensive range of different materials. Vecoplan can adapt the system's performance to input and output requirements through individual rotor and blade configurations and the relevant screen choice. Rotor changes are now a thing of the past, thanks to the concept of bolted tool holder plates with variable cutting tip sizes: Users only have to exchange the tool holder plates to quickly and easily adapt the cutting geometry to different output grain sizes. The VIZ in the trade show stand will be equipped with the patented ESC drive, which is extremely energy-efficient: a cost-effective, intelligent, self-regulating drive concept with slippage detection in real time.

As a specialist company, Vecoplan will present solutions for mechanical preparation and material handling in Birmingham. Customers receive powerful individualised machines and complete, complex systems for their specific processes. The company's specialists optimise the material flow and match the components, achieving stability, high energy efficiency and cost-effectiveness along the entire processing line. Users also benefit from Vecoplan's cutting-edge know-how and international project experience.

**Vecoplan at RWM: Hall 18, Stand R-N130**

**Meta-Title:** Vecoplan: flexible and energy-efficient shredders at RWM.

**Meta-Description:** Vecoplan will be exhibiting its high-performance VIZ shredder at RWM in Birmingham in Hall 18, Stand R-N130, and will inform visitors about solutions for mechanical processing and material handling.

**Keywords:** Vecoplan; RWM; shredding; processing; Vecoplan high-performance shredder; VIZ 1700; recycling/waste; United Kingdom

**LinkedIn:** Our Recycling/Waste division is experiencing a growing market in the UK. This is why RWM, the Recycling and Waste Management Exhibition in Birmingham, England, is a welcome opportunity to showcase our solutions from 13-14 September. We'll be exhibiting our powerful and energy-efficient VIZ 1700 in Hall 18, Booth R-N130. Thanks to its modular design, Vecoplan has many options for configuring and adapting the machine to the task at hand. Visit us in our stand! We're looking forward to seeing you!
